Summary

Software engineer with 1+ years of hands-on experience in automating, developing backend and frontend applications.

Education

D. G. Ruparel College of Arts, Science and Commerce
Bachelor of Science - Information Technology | **GPA: 9.4/10**

Mumbai, India
2022 - 2025

- **Achievements:** 1st Place - DotTech Hackathon (DGRUPAREL) | 2nd Place - Code Relay Event (VPPCOEVA)

Projects

Karzo - Event Ride Sharing Platform | *Python, Django REST Framework, Vue.js, MySQL*

- Built REST APIs using Python programming and **Django REST Framework** with JWT authentication.
- Resolved **N+1** query issues using Django ORM `select_related`.
- Reduced redundant search API calls using debouncing (**10 to 2-4** per request cycle).
- Integrated **OpenAI LLM** for automated event description generation.

ClassAccess - AI-Powered Classroom Platform (Production, Live) | *Python, Django REST Framework, React, PostgreSQL*

- Built Python REST APIs with JWT authentication and role-based access control (**RBAC**).
- Integrated Supabase storage with signed URLs for file upload and access management.
- Designed and implemented a **Retrieval-Augmented Generation (RAG)** pipeline using **LangChain**, embeddings, and FAISS-based **vector search** for page-level retrieval.
- Built AI-powered question-answering features over uploaded documents using transformer-based LLMs.
- Improved system performance and reliability using **Redis caching**, rate limiting, background jobs, and Docker-based **deployment** on Render and Vercel.

Internship Experience

Backend Engineer
Kuvaka Tech

June 2025 - July 2025
Remote

- Built email verification APIs using **Python programming** and Django REST Framework, integrating third-party verification APIs with multi-step SMTP validation logic.
- Implemented asynchronous background processing using **Celery** for bulk jobs, retries, and cleanup.
- Applied **rate limiting**, and API debugging to improve system reliability.

Full Stack Web Developer
Levaze Digital Pvt. Ltd.

April 2024 - June 2024
Remote

- Developed server-side rendered web features using **Python** Flask with Jinja templates, HTML, CSS, and JavaScript.
- Implemented authentication features including OTP flows and Google OAuth-based signup and login.
- Used Git and GitHub for version control, branching, and collaborative development.

Technical Skills

Languages: Python, JavaScript, Core Java, C, C++

Backend: Django, Django REST Framework (DRF), Flask, FastAPI, Node.js, Express.js, Celery

Databases & Storage: PostgreSQL, MySQL, SQLite, Redis, Supabase

Frontend: React.js, Vue.js, HTML, CSS, JavaScript, Tailwind CSS, Bootstrap, Jinja Templates

Tools: Git, GitHub, Docker, Linux, Postman, Render, Vercel

Other: REST APIs, SQL, JSON, API Integrations, Testing, Debugging, SDLC, ORM, OOP, LLM Integration, Query Optimization, Caching, Schema Design, JWT Authentication, RAG, LangChain, Vector Search
