EDUCATION

D. G. RUPAREL COLLEGE OF ARTS, SCIENCE AND COMMERCE

Mumbai, India

Bachelor of Science - Information Technology | **Cumulative GPA: 9.4/10**

2022 - 2025

- **Achievements:** 2nd Place - DotTech Hackathon (DGRUPAREL) | 3rd Place - Code Relay Event (VPPCOEVA)

SUMMARY

Software engineer with hands-on experience building API-driven backend and full-stack systems and a strong foundation in programming, debugging, testing, and SDLC practices. Seeking junior to associate software engineering roles.

PROJECTS

KARZO - EVENT RIDE SHARING PLATFORM | Python, Django REST Framework, PostgreSQL, Vue.js

- **Created and engineered** RESTful backend services using Django REST Framework, implementing JWT authentication and core business logic through structured **programming**, debugging, and testing.
- Optimized database performance by resolving **N+1 query issues** using **select_related** in Django ORM.
- Enhanced search responsiveness using **debouncing**, effectively eliminating unnecessary API calls and decreasing per-cycle requests from **10 to 2-4**.
- Integrated **Groq LLM** to generate event descriptions, improving content quality and user experience.

CLASSACCESS - AI POWERED TEMPORARY PDF CLASSROOM | Python, Django REST Framework, React, Redis, MySQL

- Built a platform for **secure, PDF sharing** using **JWT authentication** and **role-based access control (RBAC)**.
- Stored PDFs in **Supabase cloud storage buckets** instead of local disk, serving files via **signed URLs** to improve scalability and storage optimization.
- Implemented **AI powered PDF summarization** by using OCR style text extraction tool **pdfplumber** and generating summaries via **OpenAPI's LLM API**, with **rate limiting** to control API usage.
- Improved performance using **Redis caching** and **Celery CRON background jobs**, following core **SDLC practices** including testing, debugging, and maintenance.

INTERNSHIP EXPERIENCE

BACKEND ENGINEER

June 2025 - July 2025

Kuvaka Tech

Remote

- Developed using **Python and Django REST APIs** for an email verification system, integrating **SMTP validation**, external verification services, and basic **LLM assisted email risk classification**.
- Implemented **asynchronous background jobs** using **Celery** for bulk email processing, retries, and cleanup.
- Applied **rate limiting**, retry logic, and performed **API debugging and testing** to improve reliability and control third-party API usage.

WEB DEVELOPER

April 2024 - June 2024

Levaze Digital Pvt. Ltd.

Remote

- Built backend APIs for a **Python Flask** web application, applying structured **programming**, debugging, authentication, and OTP verification workflows.
- Integrated basic **AI powered content generation** using **Gemini LLM API** for blog drafts and summaries, and optimized database queries for improved API performance.

TECHNICAL SKILLS

Languages: Python, JavaScript, Core Java, C, C++

Backend: Django, Django REST Framework (DRF), FastAPI, Flask, Node.js, Express.js, JWT Authentication, Celery

Databases: PostgreSQL, MySQL, SQLite, Redis | Query Optimization, Schema Design

Frontend: React.js, Vue.js, HTML, CSS, Tailwind CSS, Bootstrap

Tools: Git, GitHub, Linux, Docker, Postman

Other: REST APIs, SQL, JSON, Caching, Rate Limiting, Bug Fixing, Testing, SDLC, LLM Integration, ORM, OOP
